We are fully interested in communicating you and answering all your inquiries and providing you with a decent service.

WHO IS TOURESCO™

It is our pleasure to share with you a brief about our platform, **TourEsco™**, and its provided services. We hope to fulfill your interests in knowing more about us. **TourEsco™** is not just a platform, but it can also be considered a modern, goal-oriented approach. This approach helps in developing and enhancing the way you manage your day-to-day work, ultimately providing high-quality service to your customers. Our vision is to develop a national and international, innovative approach that targets the tourism sector's support services, stakeholders, and all sectors involved to promote, sustainable growth with our partners. This will be accomplished through our electronic reservation solution, which ensures meeting the market's needs and achieves desired performance and stability with our partners. And this is what makes us a core pillar in the tourism sector organization. **TourEsco™** is committed to provide a high-quality service to small, medium, and big entities, taking into account each entity's unique specialization and professional classification. The core components for **TourEsco™** are the escorts, including tourist guides, drivers, and border assistants. **TourEsco™** believes that each customer deserves the best customer service, and this what ensures our permanent and sustainable partnership.

TourEsco
TOURIST ESCORTS

TOURIST ESCORTS

OUR BEGINNING

TourEsco™ was established in 2021, utilizing the best international programming standards.

platform consists of two hierarchically separated,

yet fully integrated components: a web-based application for tourism entities, and a mobile application for escorts.

This integration provides all necessary services for all stakeholders.

What sets TourEsco™ apart is its ability to provide a targeted and comprehensive solution

while focusing on seamless cross-functionality between the sector's stakeholders.

This will positively impact visitors, tourism entities, and escorts alike.

TourEsco™ offers powerful capabilities for both tourism entities and escorts, including
This helps in managing program and itinerary's execution effectively.

A

Tourist transportation reservation

B

Tourist car rental reservation

C

Escort reservation.

TourEsco™ enables you to manage operations even during peak times and high seasons. Tourism entities can add trips, programs, and itineraries' information into the platform and share it with escorts, including drivers, tour guides, and border assistants. Sharing can be done in three levels:

D

Tourist transportation reservation

E

Tourist car rental reservation

F

Escort reservation.

And this will increase the entities' ability to find available resources in a timely manner,

to improve response times, and to track locations to request specific itineraries.

Our team, which has the necessary business and technical knowledge and qualifications, was determined to use the best most modern and intelligent international standards in developing **TourEsco™**, to offer the below:

- The platform will be used to coordinate the associated escorts in the next three months.
- Accurate managing for the financial transactions, including commissions and fee expenses.

As we continuously strive to excel in our mission, we highly value clients' feedback to improve our platform

TourEsco™, and provide a high-quality service that perfectly meets your needs and demands.

One of the most crucial elements in **TourEsco™** is the management of car rental and tourist transportation, as these are vital aspects in the tourism industry.

This core component will maintain balance by coordinating operations and managing communications and follow-ups between car rental offices, tourist transportation, drivers, and freelance workers.

Furthermore, it will monitor the movement of drivers and freelance workers.

TourEsco™ has a search engine tool and provides statistical data for each vehicle.

This includes information on the vehicle's movements, directions, and schedules, as well as financial transactions, which enables monitoring any unacceptable behaviors.

TourEsco
TOURIST ESCORTS

TourEsco™ has provided all the necessary modules to finish the workflow cycles with the integration of the escorts pillar, which is considered at three levels. **TourEsco™** has designed this intelligent platform to cater for the support services of the tourism sector and all relevant stakeholders, using the best international programming standards.

The platform is comprised of two separated but fully integrated platforms in the hierarchical architecture, offering all necessary services through web and mobile applications for tourism entities, car rental offices, tourist transportations, and escorts.

TourEsco™ caters for the needs of all types of escorts by offering them shared itineraries and a user-friendly platform for carrying out their plans. Through the platform, escorts can:

- Make reservations and exchange itineraries
- Document and archive the financial transactions
- Document and archive trips, including the related financial transactions
- Chatting for the platform users

T O U R I S T E S C O R T S

TourEsco™ welcomes you to join us as a partner in success and to benefit from our easy-to-use, accurate, and high-quality services. This will improve the flow of operations in the industry, due to the platform's well-structured and functional design, that facilitates communication and streamlined execution leading to increased satisfaction among all stakeholders who use **TourEsco™**.

Each user will be given a 60-day free trial, where our team will be gathering feedback from the users and use it to improve the platform.

After the trial period, the team will activate a prepaid subscription fee system, which will offer various packages based on the number of trips/tours (weekly, monthly, and yearly) and payment methods.

The fees will be reasonably priced and documented in contracts, and fixed pricing with potential for discounts will be available.
